

JAMES ROLPH, JR.
New Mayor of San Francisco
Who Defeated Labor Candidate.

San Francisco, Cal., Sept. 28.—James Rolph, Jr., was elected mayor of San Francisco at the first direct primary election to determine the personnel of municipal officers of the city and county. The vote will closely approximate 80,000, the biggest vote ever cast here.

Next to the mayoralty fight, interest centered in the fight for district attorney. The leading candidates were Charles M. Fickert, incumbent, and Ralph Hathorne, endorsed by practically the same interests that supported Rolph. Indications are that Fickert gained the greater vote.

SEEK TO ENJOIN STRIKERS.

Illinois Central Asks For Protection Under Antitrust Law.
Memphis, Tenn., Sept. 28.—Asking that strikers be restrained from interfering with their employees, officials of the Illinois Central and Yazoo and Mississippi Valley railroads petitioned the local federal court for an injunction. A temporary restraining order was issued by Judge McCall and the case set for hearing Monday.

The suit for injunction is brought under the Sherman antitrust law and alleges that interstate commerce is impeded by action of the striking clerks and shopmen here in seeking to persuade persons from taking service with the railroads. Instances of losses of freight is quoted, as well as damage to property and perishable freight, which it is charged is due to interference by the strikers with the railroad business.

NO PAROLE FOR WALSH. YET.

Chicago Banker's Case May Be Decided Next Week.
Leavenworth, Kan., Sept. 28.—John R. Walsh will not be released from the federal prison here until next week, if he is paroled at all. From an authoritative source it was learned that the report of the federal board of parole will positively be made in Washington to Attorney General Wickersham by R. V. Ladow, president of the board. He has the power to send the report by mail or telegraph, but it is known that this will not be done. Mr. Ladow will not be in Washington until the early part of next week.

Following the receipt of the board's recommendation by the attorney general, if it is favorable to the prisoner, the final action of parole will be taken.

TURKISH TROOPS AT TRIPOLI.

Transport Dorna Arrives With 2,000 Men.
Rome, Sept. 28.—The Turkish transport Dorna has arrived at Tripoli with soldiers, arms and provisions.

The Dorna sailed for Tripoli before Italy had notified Turkey with regard to her intentions. The soldiers were intended to protect Tripoli from the threatened attack of some 2,000 brigands who hovered about the city.

It is not known how the rumor got about that the Dorna was captured by Italian warships.

Wants Bailey's Seat.

Austin, Tex., Sept. 28.—Thomas H. Ball, leader of the Prohibitionists in the recent state wide election, will be a candidate to succeed J. W. Bailey in the United States senate.

Weather Probabilities.

Fair and cooler today; Friday, fair.

Market Reports.

BUTTER—Firm; receipts, 8,543 packages; creamery, specials, per lb., 28 1/2c; extras, 27 1/2c; thirds to firsts, 25 1/2c; state dairy, common to prime, 20a-25 1/2c; process, seconds to specials, 19a-23 1/2c; factory, current make, 17 1/2c; packing stock, 16 1/2c.

CHEESE—Firm; receipts, 4,352 boxes; state, whole milk, specials, per lb., 14c; average fancy, 14 1/4c.

EGGS—Irregular; receipts, 18,356 cases.

POTATOES—Weak; sweets, southern, per bush, \$2.50.

DRESSED POULTRY—Weak; turkey, fresh, spring, choice, per lb., 13 1/4c; old, 12 1/4c.

MEATS—Live veal calves, common to choice, per 100 lbs., \$7.50-10.75; live buttermilk and grass calves, 12a-15.50; live calves, western and southern, 12a-15.50.

MOUNT ETNA IN ERUPTION EVERY FOUR OR FIVE YEARS

Last Previous Serious Outbreak Was In January, 1907. Newspaper Correspondent's Description of 1908 Eruption.

THE latest eruption of Mount Etna is considered the most grave in years. It has been estimated that Etna's periods of activity occur at intervals of four or five years, as a rule, and as the last serious eruption was in January, 1907, the volcano may be said to be maintaining its schedule. Although the disturbance of 1907 was pronounced, it was by no means as destructive as the great eruption of 1892. The most destructive previous outbreaks on record occurred in 1169, 1669, 1693, 1792, 1879, 1886 and 1892.

There was a mild outbreak in May, 1908, and for a time the inhabitants along the slopes and in nearby towns were thrown into excitement, but Etna subsided after covering the countryside with smoke and ashes and was not heard from again until March, 1910, when at the height of the tourist season in Sicily the crater opened. It is not the height so much as the tremendous extent of the mountain that has impressed tourists. Its base spreads out almost twenty-five miles, and from there to the summit it is almost a perfect cone. At certain seasons the sides are covered with snow halfway down. The crater is 10,000 feet above sea level, making Etna the loftiest volcano in Europe and the highest peak in Italy south of the Alps.

Eruption of 1907.
On Dec. 28, 1908, at the time of the Messina disaster, loud detonations were heard, and volumes of smoke rolled out of the crater. A panic arose among the people of Catania, the nearest town to the volcano, but Professor Rieco, director of the observatory, said that a great eruption was not expected. His views were confirmed by Frank Perret, assistant director of the royal observatory on Mount Vesuvius, who, after an inspection of Mount Etna on April 30, 1909, reported: "The earthquake at Messina has reduced its activity and for the time being has taken the energy necessary to create an eruption. Reports that Mount Etna was in eruption are untrue, as there has been only a slight emission of vapors from the crater."

It was on Jan. 9, 1907, that Mount Etna awoke after a period of inactivity since the eruption of 1899. Smoke, ashes and flame arose from its summit, which was covered with snow. On Jan. 16, 1907, the volcano, at the same time that the earthquake at Kingston, Jamaica, occurred, became more active. Professor Rieco said that the fire openings inside the crater, discovered in 1893, had increased in size, but that only smoke and the reflection of fire could be seen. Ashes were thrown out, and subterranean detonations were heard. On May 8 of the same year the eruption became more violent. The lava flow increased, and the smoke was so abundant that the whole atmosphere as far as Catania was thick with it. There were severe earth shocks, and Professor Rieco was apprehensive of a great eruption.

Eruption of 1908.

It was a year later before the volcano became active again. This time there were earthquakes in continuous shocks, and a new crater opened at a height of 7,000 feet. It ejected columns of steam and clouds of stones and ashes. This crater became the source of two streams of lava, which followed the course taken by the lava in the eruption of 1819 and 1852.

How Etna Spouts Fire.
Describing the appearance of Etna in the eruption of 1908, a correspondent from Taormina wrote: "Nothing could have looked more peaceful that Etna on the afternoon of my arrival here. The sun went down behind it out of a clear sky, its outlines becoming blacker and more obscure until finally swallowed up in darkness. From outward signs it was the same sleeping beauty that it had been since the last eruption in 1899. In the morning—April 29—there was a change. The peak was enveloped in vapor, which it took only a few seconds to observe was smoke, not cloud, but even then I did not realize that there was anything unusual until I noticed the excitement of the Italians.

"Smoke was coming from the crater at the summit, but by far the larger part from the east side of the mountain, a considerable way down, while now and then would come a rumble, sounding like cannon far away. Later in the forenoon the vapors from the topmost cone ceased, and the smoke swirled out black and menacing from lower down, taking the shape of a funnel and rolling seaward on the wings of a westerly wind.

Novel Sight.

"The sight was as novel to natives as to visitors and perhaps more full of meaning. All day long they kept stealing away from their work and running to the watchtowers or other vantage points to watch the changing aspects on the mountain, but they could not tell by day whether the volcano was in eruption.

"Wait until night," they said. "Then if lava is flowing out it will show red through the darkness."

"So interest increased toward dusk, and as the shadows thickened word went around the town: 'L'Etna fuma! L'Etna fuma!' True it was. The giant fountain, after a ten years' truce with the inhabitants of its fertile and expansive slopes, was again belching forth lava from the earth's inward, though to what extent or with what disaster one could only conjecture.

"From Taormina it appeared as would a huge bonfire on a hill perhaps a mile away, which glowed red and yellow and now and then flared up as if some one had thrown on fresh brush. But when one considered that the burning patch in the darkness was not one but almost twenty miles away he realized that what he saw was a roaring furnace and that what to his eye seemed gentle flickers were, in truth, huge masses of molten lava spouted many feet in the air, the result of tremendous convulsions in the depths below."

GIVES UP PORT ARTHUR.

Japan Moves to Chinhai Bay on Korean Coast For a Gibraltar.

Purely strategical reasons have induced the Japanese government to decide upon the abandonment of a naval station at Port Arthur, in Manchuria, representing an investment of many millions of dollars. This station was built by the Russians when they were in control of the Liaoting peninsula under a nominal lease from China. Even after it was shown to fall of that degree of impregnability which was the expectation of its founders and fell into the hands of the Japanese as an incident of the Russo-Japanese war the victors did not hesitate to spend another great sum of money upon the defenses.

But the acquisition of Korea by Japan has made the Port Arthur station secondary in importance from a naval point of view. It was too far inland to be of any use in the defense of Korea, so the decision has been reached to abandon the place as a naval station and to transfer as much of the material as can be used elsewhere to the new site selected at Chinhai bay, on the coast of Korea, a position that will command the entrance to the Yellow sea and the great gulf of Pechili, as well as afford a measure of protection to the western coast of Japan and the strait of Korea.

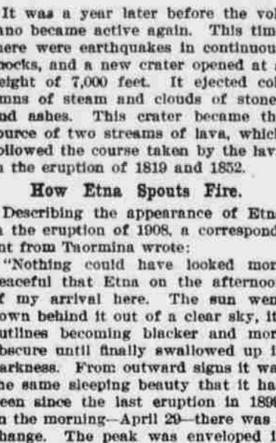

Great docks will be constructed at this place, which will be reserved exclusively for naval purposes. The port will be closed to commerce, while Port Arthur will be released for the use of the merchant marine.

High Cantilever Bridge.

Half of the construction work on the Crooked river bridge of the Oregon Trunk railway has been completed, and workmen are placing the steel parts of the remaining half in position. One-half of the steel arch extends from the north bank of the river out over midstream and 340 feet above the water. The length of the bridge from bank to bank will be 322 feet.

CHARLES CURTIS.

Indian Senator From Kansas Who Was Taft's Host at Topeka.

MOTOR BUS IN SEINE.

Accident in Paris Already Has Cost Lives of Five.

Paris, Sept. 28.—A crowded motor bus from the Patignolles quarter to the Jardin des Plantes fell into the Seine while crossing the Notre Dame bridge. The driver of the bus lost control of it. Up to the present five dead and three injured have been taken out of the river.

M. Lepine, chief of police, is present. A number of clergymen from Notre Dame cathedral are also present, administering the last rites.

TRIPOLI IS BLOCKADED.

Italian Vessels Most Vigilant at Scene of Trouble.

Paris, Sept. 28.—The Era's Rome correspondent telegraphs that Tripoli is entirely blockaded by the first squadron, which for the past few days has been most vigilant. A vessel arriving at Malta reported that she was followed and searchlights were thrown upon her.

The correspondent of the Temps at Constantinople wires that the Turkish fleet at Beirut has been ordered to Constantinople immediately.

London, Sept. 28.—The Mail's correspondent at Rome informs his paper that the pope through Merry Del Val, the papal secretary, has expressed sympathy in the Italian plans, declaring that the occupation of Tripoli will be a triumph in the progress of civilization.

VOICE HER FORTUNE.

Washington Telephone Girl Wins Rich Husband.
New York, Sept. 28.—William Ell Jessup, forty-nine years old, a wealthy railroad engineer of Cornwall-on-the-Hudson, is on his honeymoon, following one of the quickest courtships and marriages on record.

The bride was Miss Myrtle E. Bell, thirty-one years old, a telephone operator of Washington, D. C., a "girl with a golden voice," according to the happy bridegroom.

FOR GOVERNMENT CONTROL.

Conservation Congress Wants Alaskan Coal Lands Protected.

Kansas City, Mo., Sept. 28.—W. J. Bryan addressed the national conservation congress. He left politics entirely out of his address and spoke generally on the conservation subject. He placed emphasis on a statement that the character of man is the controlling principle of conservation.

The session was enlivened by reports that "the interests" were trying to dictate the resolutions and control the convention. The resolutions, however, are of special interest in that they recommend the government ownership of railroads in Alaska and control of the coal lands.

REMOVE DEFECTIVE POWDER.

French 'Warships Now Taking Precautionary Measures.

Toulon, Sept. 28.—M. Delcasse, the minister of marine, visited the wreck of the Liberte and afterward called at the General hospital to see the wounded. The latest official list of dead and missing places the number at 225.

The salvage corps has succeeded in taking from the deck of the battleship Republique a piece of the armor plate of the Liberte weighing thirty-seven tons. The disembarkation from the warships of all powder placed in stock prior to 1902 has begun. It is claimed that most of this powder is defective.

LOOK OUT FOR BAD \$10 BILL.

Secret Service Head Says It's a Dangerous Counterfeit.

"This is a dangerous counterfeit and calculated to deceive," says acting Chief Moran of the secret service in a circular issued giving warning of a new counterfeit ten dollar national bank note. It is on the Anglo and London-Paris National bank of San Francisco and bears the portrait of William McKinley. It is of the series of 1902-03 and bears a check letter "B."

This counterfeit is regarded by the secret service men as the work of the person responsible for the counterfeit ten dollar Pasadena National bank note which made its appearance in September, 1910. It is printed—on photograph etched plates of good workmanship on two pieces of paper, between which silk threads have been distrib-
